

*Want to study abroad? Interested in primates?  
Learn about forest ecology and primate behavior!*

## SUMMER IN THE RAINFOREST

### Primate Behavior & Ecology at La Suerte Biological Field Station

June 22 – July 17, 2012

This course covers the behavior and ecology of Old & New World primates from an evolutionary perspective. Emphasis is on the species present at La Suerte, Costa Rica - white-faced capuchin monkeys and mantled howler monkeys. You will gain actual field experience in primatological data collection techniques and you will design and conduct your own short independent research project. The material and topics covered in this course are equivalent to an upper division university course in primate behavior and ecology, but with a greater emphasis on field methods, data collection, and research design. A background in biology or physical anthropology is helpful but not required. It is far more important to have a serious interest in learning about primates and a desire to do field work in a tropical rainforest. Each day will be a combination of lectures, seminars and fieldwork, and forest exploration.

Instructor: LeAndra Luecke, PhD  
Washington University in St. Louis

Course Fee \$2095.00
